BULLETIN
OF THE
BUREAU OF STANDARDS

S. W. STRATTON, DIRECTOR

VOLUME 3, PART 2

(Nos. 1, 2, 3, 4)

1907

WASHINGTON
GOVERNMENT PRINTING OFFICE

1907

INDEX TO VOLUME 3.

A.

- Ammeters, alternating current, for precision measurements, 43.
Arc, electric, Production of high-frequency oscillations from, *L. W. Austin*, 325.
Areas, rectangular, Geometrical mean distances of, *E. B. Rosa*, 1.
Austin, L. W., The production of high-frequency oscillations from the electric arc, 325.
Ayrton-Jones absolute electro-dynamometer, *E. B. Rosa*, 209.

B.

- Bates, F. J., and J. C. Blake*, The influence of basic lead acetate on the optical rotation of sucrose in water solution, 105.
Black-body, experimental, 165.
Blake, J. C., F. J. Bates and, The influence of basic lead acetate on the optical rotation of sucrose in water solution, 105.
Buckingham, E., On the establishment of the thermodynamic scale of temperature by means of the constant-pressure thermometer, 237.
Burgess, G. K., Melting points of the iron group elements by a new radiation method, 345.
Burgess, G. K., C. W. Waidner and, Radiation from and melting points of palladium and platinum, 163.

18398—08

C.

- Cadmium, purification and preparation of, for standard cells, 626.
Cadmium sulphate, purification and preparation of, for standard cells, 628.
Cady, F. E., E. P. Hyde and, On the determination of the mean horizontal intensity of incandescent lamps, 357.
Cain, J. R., H. N. Stokes and, On the colorimetric determination of iron with special reference to the chemical reagents, 115.
Cain, J. R., H. N. Stokes and, On sulphocyanic acid, 157.
Calculation of self-inductance, *E. B. Rosa*, 1.
Calorimetric resistance thermometers, *H. C. Dickinson* and *E. F. Mueller*, 641.
Capacity, Simultaneous measurement of, and power factor of condensers, *F. W. Grover*, 371.
Cells, Clark and Weston standard, preliminary specifications for, *F. A. Wolff* and *C. E. Waters*, 623.
Chromium, Melting point of, 352.
Circle and a coaxial single-layer coil, Mutual inductance of, *E. B. Rosa*, 209.
Clark and Weston standard cells, Preliminary specifications for, *F. A. Wolff* and *C. E. Waters*, 623.

729

Cobalt, Melting point of, 349.

Cohen, L., An exact formula for the mutual inductance of coaxial solenoids, 295.

Cohen, L., E. B. Rosa and, The mutual inductance of coaxial solenoids, 305.

Coil, coaxial single-layer, Mutual inductance of a circle and a, *E. B. Rosa*, 209.

Colorimeter for determination of iron, 121.

Colorimetric determination of iron with special reference to chemical reagents, *H. N. Stokes* and *J. R. Cain*, 115.

Comparison of the unit of luminous intensity of the United States with those of Germany, England, and France, *E. P. Hyde*, 65.

Comparison of the various methods of determining the ratio of the electromagnetic to the electrostatic unit of electricity, *E. B. Rosa* and *N. E. Dorsey*, 605.

Condensers, Simultaneous measurement of the capacity and power factor of, *F. W. Grover*, 371.

Constant-pressure thermometer, Establishment of thermodynamic scale of temperature by means of, *E. Buckingham*, 237.

Corresponding states, application of the law of, 258.

D.

Determination, Colorimetric, of iron with special reference to chemical reagents, *H. N. Stokes* and *J. R. Cain*, 115.

Determination of the mean horizontal intensity of incandescent lamps, *E. P. Hyde* and *F. E. Cady*, 357.

Determination, A new, of the ratio of the electromagnetic to the electrostatic unit of electricity, *E. B. Rosa* and *N. E. Dorsey*, 438.

Dickinson, H. C., and *E. F. Mueller*, Calorimetric resistance thermometers and the transition temperature of sodium sulphate, 641.

Dickinson, H. C., C. W. Waidner and, On the standard scale of temperature in the interval 0° to 100° C., 663.

Dorsey, N. E., E. B. Rosa and, A new determination of the electromagnetic to the electrostatic unit of electricity, 438.

A comparison of the various methods of determining the ratio of the electromagnetic to the electrostatic unit of electricity, 605.

E.

Electric arc, Production of high-frequency oscillations from, *L. W. Austin*, 325.

Electricity, ratio of the electromagnetic to the electrostatic unit of, A new determination of the, *E. B. Rosa* and *N. E. Dorsey*, 438.

Electricity, ratio of the electromagnetic to the electrostatic unit of, Comparison of the various methods of determining the, *E. B. Rosa* and *N. E. Dorsey*, 605.

Electro-dynamometer, The compensated two-circuit, *E. B. Rosa*, 43.

Electro-dynamometer, the Ayrton-Jones absolute, *E. B. Rosa*, 209.

Establishment of the thermodynamic scale of temperature by means of the constant-pressure thermometer, *E. Buckingham*, 237.

F.

Fechner's law, Complete form of, *P. G. Nutting*, 59.

Formula, An exact, for the mutual inductance of coaxial solenoids, *L. Cohen*, 295.

Frosted lamps, An explanation of the short life of, *E. P. Hyde*, 341.

G.

- Graphite arc, Experiments with the, 329.
 Gray electro-dynamometer, Equation for, 224.
Grover, F. W., Simultaneous measurement of the capacity and power factor of condensers, 371.

H.

- Hyde, E. P.*, A comparison of the unit of luminous intensity of the United States with those of Germany, England, and France, 65.
 Geometrical theory of radiating surfaces with discussion of light tubes, 81.
 An explanation of the short life of frosted lamps, 341.
Hyde, E. P., and *F. E. Cady*, On the determination of the mean horizontal intensity of incandescent lamps, 357.

I.

- Ice point, Thermodynamic temperature of the, 269.
 Incandescent lamps, Determination of the mean horizontal intensity of, *E. P. Hyde* and *F. E. Cady*, 357.
 Influence of basic lead acetate on the optical rotation of sucrose in water solution, *F. J. Bates* and *J. C. Blake*, 105.
 Iron, colorimetric determination of, with special reference to chemical reagents, *H. N. Stokes* and *J. R. Cain*, 115.
 Iron group elements, Melting points of the, by a new radiation method, *G. K. Burgess*, 345.
 Iron, Melting point of, 348.

L.

- Lamps, An explanation of the short life of frosted, *E. P. Hyde*, 341.
 Lamps, Determination of the mean horizontal intensity of incandescent, *E. P. Hyde* and *F. E. Cady*, 357.

Lead acetate, Influence of basic, on the optical rotation of sucrose in water solution, *F. J. Bates* and *J. C. Blake*, 105.

Light tubes, Discussion of, *E. P. Hyde*, 81.
 Lorenz apparatus and Ayrton-Jones absolute electro-dynamometer, *E. B. Rosa*, 209.

M.

- Manganese, Melting point of, 352.
 Mean distances, Geometrical, of rectangular areas and the calculation of self-inductance, *E. B. Rosa*, 1.
 Mean horizontal intensity of incandescent lamps, On the determination of the, *E. P. Hyde* and *F. E. Cady*, 357.
 Measurement, Simultaneous, of the capacity and power factor of condensers, *F. W. Grover*, 371.
 Melting points of the iron group elements by a new radiation method, *G. K. Burgess*, 345.
 Melting points of palladium and platinum, Radiation from and, *C. W. Waidner* and *G. K. Burgess*, 163.
 Mercurial thermometry, 667.
 Mercury, Purification and preparation of, for standard cells, 624.
Mueller, E. F., *H. C. Dickinson* and, Calorimetric resistance thermometers and the transition temperature of sodium sulphate, 641.
 Mutual inductance of a circle and a coaxial single-layer coil, *E. B. Rosa*, 209.
 Mutual inductance of coaxial solenoids, An exact formula for the, *L. Cohen*, 295.
 Mutual inductance of coaxial solenoids, *E. B. Rosa* and *L. Cohen*, 305.

N.

- Nickel, Melting point of, 351.
Nutting, P. G., Complete form of Fechner's law, 59.

O.

Oscillations from the electric arc, Production of high frequency, *L. W. Austin*, 325.

P.

Palladium and platinum, Radiation from and melting points of, *C. W. Waidner* and *G. K. Burgess*, 163.

Platinum, palladium and, Radiation from and melting points of, *C. W. Waidner* and *G. K. Burgess*, 163.

Porous-plug experiment, Theory of the, 243.

Power factor of condensers, Simultaneous measurement of the capacity and, *F. W. Grover*, 371.

R.

Radiation from and melting points of palladium and platinum, *C. W. Waidner* and *G. K. Burgess*, 163.

Radiation method, Melting points of the iron group elements by a new, *G. K. Burgess*, 345.

Radiating surfaces, Geometrical theory of, *E. P. Hyde*, 81.

Ratio of the electromagnetic to the electrostatic unit of electricity, New determination of, *E. B. Rosa* and *N. E. Dorsey*, 438.

Ratio of the electromagnetic to the electrostatic unit of electricity, Comparison of the various methods of determining the, *E. B. Rosa* and *N. E. Dorsey*, 605.

Reagents, On the colorimetric determination of iron with special reference to chemical, *H. N. Stokes* and *J. R. Cain*, 115.

Reagents used in colorimetric iron determination, 119.

Rosa, E. B., On the geometrical mean distances of rectangular areas and the calculation of self-inductance, 1.

The compensated two-circuit electro-dynamometer, 43.

Rosa, E. B.—Continued.

The mutual inductance of a circle and a coaxial single-layer coil—The Lorenz apparatus and the Ayrton-Jones electro-dynamometer, 209.

Rosa, E. B., and *L. Cohen*, The mutual inductance of coaxial solenoids, 305.

Rosa, E. B., and *N. E. Dorsey*, A new determination of the ratio of the electromagnetic to the electrostatic unit of electricity, 438.

A comparison of the various methods of determining the ratio of the electromagnetic to the electrostatic unit of electricity, 605.

S.

Scale of temperature, On the establishment of the thermodynamic, *E. Buckingham*, 237.

Scale, On the standard, of temperature in the interval 0° to 100° C., *C. W. Waidner* and *H. C. Dickinson*, 663.

Self-inductance, Calculation of, *E. B. Rosa*, 1.

Single-layer coil, Mutual inductance of a circle and a coaxial, *E. B. Rosa*, 209.

Sodium sulphate, Transition temperature of, *H. C. Dickinson* and *E. F. Mueller*, 641.

Solenoids, Exact formula for the mutual inductance of coaxial, *L. Cohen*, 295.

Solenoids, The mutual inductance of coaxial, *E. B. Rosa* and *L. Cohen*, 305.

Specifications, Preliminary, for Clark and Weston standard cells, *F. A. Wolff* and *C. E. Waters*, 623.

Stokes, H. N., and *J. R. Cain*, On the colorimetric determination of iron with special reference to chemical reagents, 115.

On Sulphocyanic Acid, 157.

Sucrose in water solution, Influence of basic lead acetate on optical rotation of, *F. J. Bates* and *J. C. Blake*, 105.

Sulphocyanic acid, *H. N. Stokes* and *J. R. Cain*, 157.

Sulphur, Boiling point of, 281.

Surfaces, Geometrical theory of radiating, *E. P. Hyde*, 81.

T.

Temperature, Standard scale of, in the interval 0° to 100° C., *C. W. Waidner* and *H. C. Dickinson*, 663.

Temperature, Thermodynamic scale of, *E. Buckingham*, 237.

Temperature, Transition, of sodium sulphate, *H. C. Dickinson* and *E. F. Mueller*, 641.

Theory, Geometrical, of radiating surfaces, *E. P. Hyde*, 81.

Thermometers, Calorimetric resistance, *H. C. Dickinson* and *E. F. Mueller*, 641.

Thermometer, constant-pressure, Establishment of the thermodynamic scale of temperature by means of, *E. Buckingham*, 237.

Tubes, light, Discussion of, *E. P. Hyde*, 81.

Two-circuit electro-dynamometer, Compensated, *E. B. Rosa*, 43.

U.

Unit of electricity, New determination of ratio of electromagnetic to electrostatic, *E. B. Rosa* and *N. E. Dorsey*, 438.

Unit of electricity, Comparison of various methods of determining ratio of electromagnetic to the electrostatic, *E. B. Rosa* and *N. E. Dorsey*, 605.

Unit of luminous intensity of the United States, Comparison of, with those of Germany, England, and France, *E. P. Hyde*, 65.

W.

Waidner, C. W., and *G. K. Burgess*, Radiation from and melting points of palladium and platinum, 163.

Waidner, C. W., and *H. C. Dickinson*, On the standard scale of temperature in the interval 0° to 100° C., 663.

Waters, C. E., *F. A. Wolff* and, Preliminary specifications for Clark and Weston standard cells, 623.

Wattmeters, 57.

Wolff, F. A., and *C. E. Waters*, Preliminary specifications for Clark and Weston standard cells, 623.

Z.

Zinc, purification and preparation of, for standard cells, 625.

Zinc sulphate, purification and preparation of, for standard cells, 627.
